

Moisture Management & Weather Barrier System

Self-Adhesive Housewrap

Model: VWC523SA

VWC523SA is a self-adhered commercial housewrap with an integrated adhesive backing, designed to reduce reliance on mechanical fasteners.

This application method simplifies installation and limits potential penetrations caused by staples or nails. As a result, it forms a continuous water-resistive and air barrier, supporting the long-term performance and integrity of the building envelope.

Product Information

Width x Length	1.524 m x 30.48 m
Package	49 rolls/pallet

Technical Specifications

Gram Weight	187 g/m ² (ASTM D3776)
Vapor Permeance	28 perms (ASTM E96)
Tensile Breaking Strength	Machine Direction (MD): 448 N Cross Direction (CD): 278 N (ASTM D5034)
Elongation at Break	Machine Direction (MD): 129% Cross Direction (CD): 111% (ASTM D5034)
180° Peel Force	Aluminum Board: 1.008 N/mm OSB Board: 0.439 N/mm MgO Board: 0.857 N/mm (AAMA 711-20)
